.NET MAUI in .NET

Unified .NET

One Base Class Library
Type Unification
CLI Support
SDK Style Projects
Modern Support Lifecycle

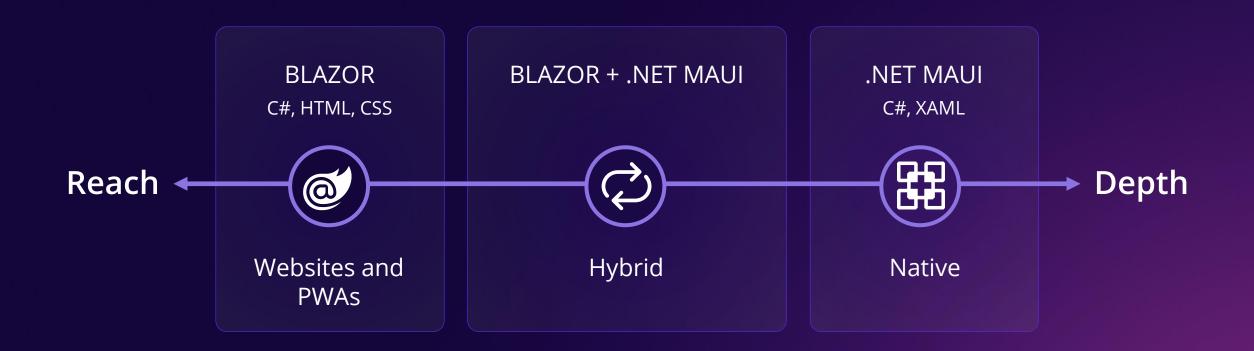

Mobile, desktop, hybrid Android iOS WinUI Mac Catalyst Blazor WebView

Productive development

Single Project
Microsoft.Extensions
.NET Hot Reload
XAML Hot Reload
Visual Diagnostics

.NET offers choice for developers

Blazor Hybrid apps

Reuse UI components across native and web

Native app container & embedded controls

No WebAssembly, No Server

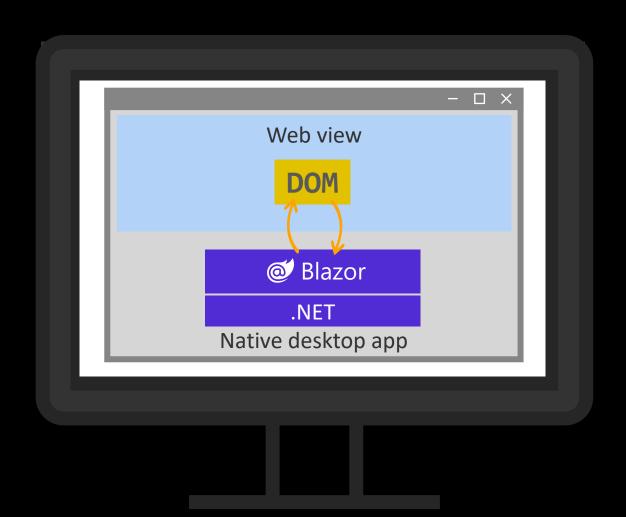

Built on top of .NET Multi-platform App UI

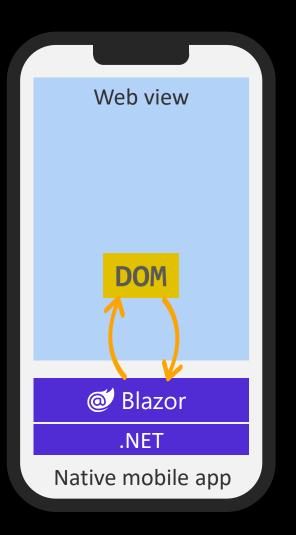

Access native APIs

Mix & Match Web/Native UI

Blazor Hybrid apps

Runs 100% of the app natively on the device in one process

No HTTP, no network, no browser sandbox

Only the HTML UI is rendered into a web view control

Hybrid Architecture

Shared Business Logic

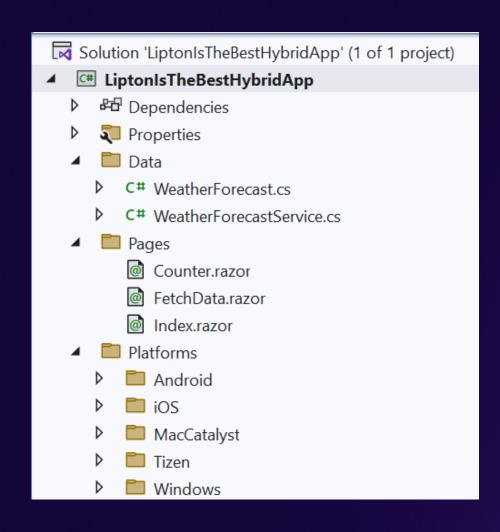

Demo

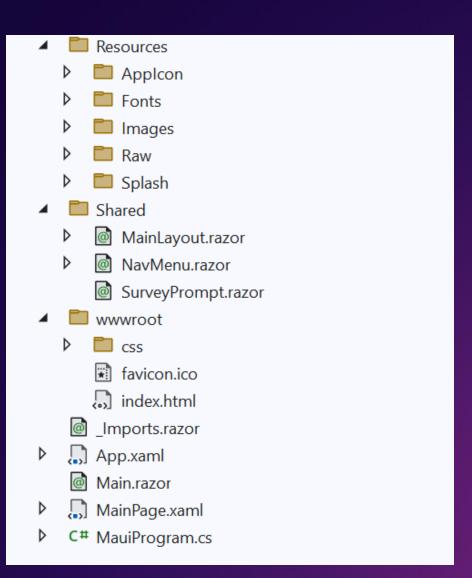

Blazor Hybrid with .NET MAUI

Sharing Code & Components

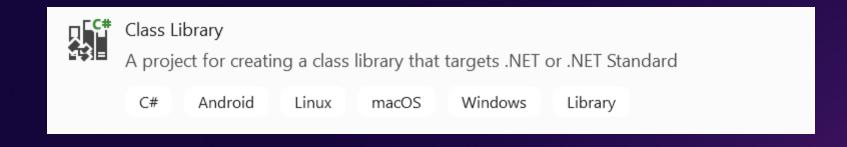

A little Blazor or a lot of Blazor

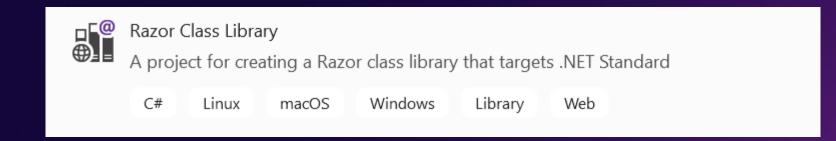

Where's the code sharing!?!?!

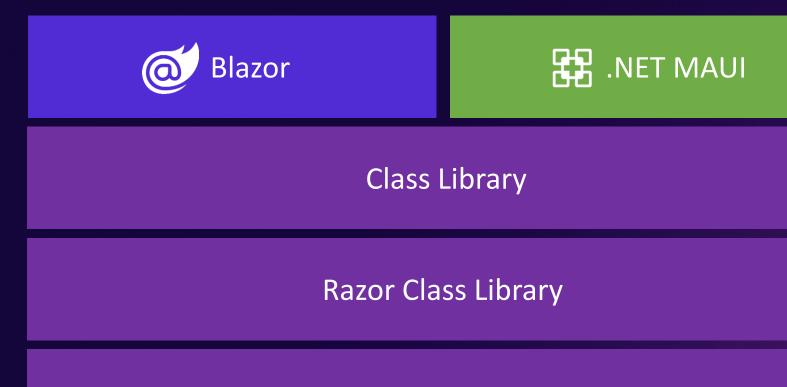

Class Libraries to the Rescue!

Sharing Code & Components

API Interfaces (Class Library)

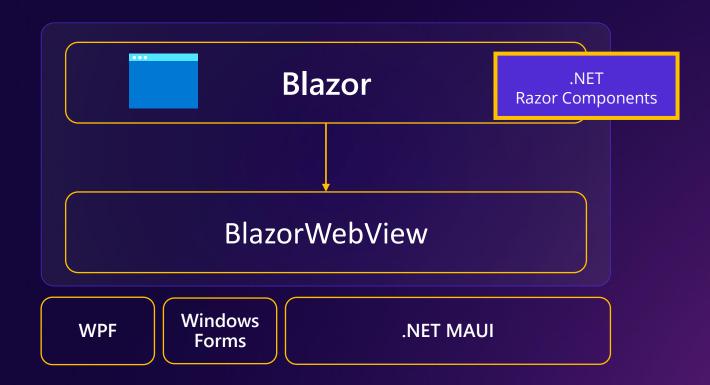

Blazor Implementations

.NET MAUI Implementations

Blazor Hybrid apps

Reuse UI components across native and web

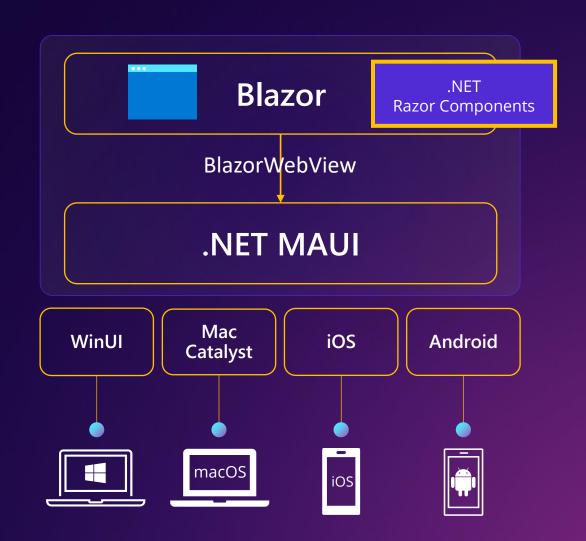

Native app container & embedded controls

No WebAssembly, No Server

Built on top of .NET Multi-platform App UI

Access native APIs

Mix & Match Web/Native UI

Blazor Hybrid app patterns

- Build new apps composed of RCLs that can be used on the web or in native apps
- Re-use entire Blazor Web app in a native app
- Modernize existing native app with "islands of Blazor"
 - And then grow the island until it can migrate to the web or to .NET MAUI

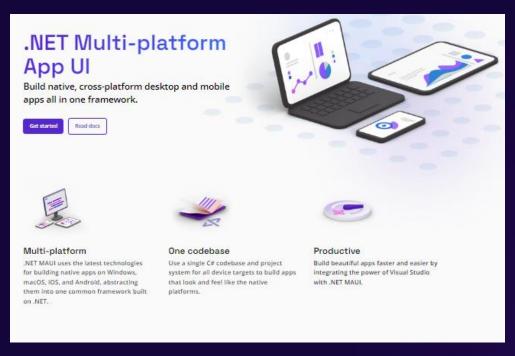

Summary

- Choose web, native, or hybrid with Blazor
- Built on .NET MAUI for cross platform
- Modernize WPF and WinForms apps
